

**Illinois Aviation Museum
Seminar Topics
2013**

March 21, 2013 “Getting back into Flying”

The presentation will focus on what you need to do to get back into flying, whether its been a long winter break, a few years since you have been in the air, or a medical concern that has kept you grounded. We will review current requirements, BFR requirements, the Sport Pilot regulation, and other options.

April 25, 2013 “Weather from a Weather man’s perspective”

Mark Strehl

May 23, 2013 “Airspace Refresher”

The presentation will focus on airspace in the Chicago area and the many pitfalls of flying in this area. It will also address TFRs.

June 20, 2013 “Ups and Downs of Takeoffs and Landings”

The presentation will look at the methods and procedures of making smooth landings under both good and bad conditions.

July 25, 2013 “Operations at towered & non-towered Airports”

The presentation will be focused on operations at towered & non-towered airports and will discuss standard procedures, and practices that should be followed to make flying safe.

August 22, 2013 “Aircraft Accidents”

Learn the causes of aircraft accidents. Actual aircraft accidents will be reviewed along with the subsequent investigations that took place to determine the cause of the accident. Intriguing photos and data will be available.

September 19, 2013 “Aviation Wannabee Seminar”

Learn what it takes to get a Pilots license and how you can get your wings to be ready to fly come Spring. Weather is sometimes a problem but winter flying is great.

October 17, 2013 “Winter Flying”

Learn the ins and outs of winter flying. Where will you find ice and how do you handle flight into inadvertent icing.
